- 🔥 Width 2300mm
- 🔥 Height 1760mm
- 🔥 Rocker Roller suspension
- 🔥 Road ready lights and indicators

**The PATON Fire Fighting Trailers are a heavy duty trailer that will carry either 2000 litres or 1200 litres of water and fire gear anywhere you need to go.**

Featuring a durable polyethelene tank with an internal baffle, the units give you a stable platform to fight fires, conduct burn off activity or simply cart water.

The combination of trusted brands using a HONDA 5.5 hp engine and DAVEY Pump means water pressure and delivery are both efficient and fast when required. Combine this with 20 metres of 25mm fire fighting hose, a 10 metre 38mm Heliflex transfer hose and Camlock quick release fittings, and your fire fighting system is complete.

Onboard storage is provided with a large toolbox cabinet at the front, and larger handle tools such as rakes and shovels can be stored in the canister tubing provided also. A safety rail is also incorporated into the trailer design to protect and support the individual riding on the trailer while undertaking fire work.

**Rec Retail Price 1200L \$5,830 +GST | 2000L \$9,295 +GST**

## SKID PACKAGES

JANUARY 2019

**The Paton Fire Fighting Skid Packages have been designed and manufactured for rapid deployment. Purpose built to allow filling at any water source; including dams, creeks and water tanks. Also the perfect unit for general water cartage.**

The 800 and 1200 litre models are designed to be mounted onto the rear of a ute or small trailer.

The 2000 litre model when full will weigh over 2 tonne, so it is designed for a truck or tandem trailer. All units come with the following:

### CHECK BEFORE YOU BUY ANY FIRE FIGHTER UNIT

Before you buy ensure the unit comes complete with first time start HONDA motor, DAVEY pump, 20m fire hose, 10m transfer hose, quality nozzle, and Camlock quick-couple fittings. Remember, these units are designed to be used in an emergency and reliability is critical.
